

The Freeman Corporation Policy on Sourcing of Wood

The Freeman Corporation is committed to ensure a continuous supply of forest products for generations to come. The Freeman Corporation was the first veneer producing company in North America to become FSC-COC certified. We are one of the largest producers of FSC Certified and Controlled veneers in the world, and have been a leader in this field since 1995.

The Freeman Corporation is committed to implementing our best efforts to not source wood fiber from:

- Illegally Harvested wood
- Wood harvested in violation of traditional and civil rights
- Wood harvested in forests where high conservation values are threatened by management activity
- Wood harvested in forests and converted to plantations or non-forest use
- Wood from forest where genetically modified trees are being planted

The Freeman Corporation is committed to identifying the source of wood for all products we produce according to the FSC rules and establish the origin of the materials used to ensure compliance with the policy. All of the veneer that we produce is either FSC Certified or FSC Controlled.
